

MANOHARI GARA

Senior Full-Stack Engineer / Web Developer

Email: manu.manohari90@gmail.com | Mobile: +91 6281168229 / +91 7330605656

LinkedIn: linkedin.com/in/manohari-g-a7054262

PROFESSIONAL SUMMARY

Accomplished Senior Full-Stack Engineer with 9+ years of professional web application engineering experience specializing in dynamic ReactJS development (3.5+ years), core Python backend architectures (2+ years), API development (FastAPI), and robust cloud solutions. Highly proficient in optimizing frontend web apps, deploying containerized cloud workflows on AWS infrastructure, and maintaining production-level environments. Background includes 4+ years of PHP application and full-cycle WordPress enterprise management, providing unique full-spectrum lifecycle capability from legacy system migration to generative AI-driven system modernization.

CORE TECHNICAL SKILLS

Frontend Engineering:	ReactJS, JavaScript (ES6+), Redux, HTML5, CSS3, Bootstrap, Responsive UI Design
Backend & APIs:	Python, FastAPI, PHP, RESTful API Development, CRUD Frameworks, MySQL, PostgreSQL
Cloud & DevOps:	AWS Lambda, Amazon S3, EC2, IAM, CI/CD Pipelines, GitHub Actions, AWS Containerization
Deployments & DNS:	Domain & DNS Management, Domain Propagation Troubleshooting, GoDaddy, Hostinger, Vercel
CMS & CRM Platforms:	WordPress Administration, Platform Security, Plugin Customization, WooCommerce, GoHighLevel
Tools & Methodologies:	Git Version Control, SVN, Figma, Agile Software Development, Code Review, Mentorship

PROFESSIONAL EXPERIENCE

Yotta TechPorts — Sr. Software Associate (L3)	<i>Oct 2021 – Present Hyderabad, India</i>
- Architect, develop, and maintain multi-tier ReactJS frontend applications and Python backend architectures closely integrated with scalable AWS ecosystem services. - Design and deploy containerized APIs utilizing Python (FastAPI) and automated CI/CD deployment architectures optimized for low-latency serverless performance via AWS Lambda and Amazon S3. - Manage complete infrastructure landscapes, including production-level domain management, DNS/domain propagation troubleshooting, hosting configurations, and cross-platform architecture migration. - Oversee enterprise-level WordPress security orchestration, administrative platform permissions, customized multi-tenant plugins, and multi-environment deployment configurations. - Spearhead architecture migrations transforming legacy CMS systems into modern decoupled web applications and secure interactive mobile frameworks. - Collaborate systematically with client stakeholder panels to evaluate and map business logic into robust, production-ready, and user-centric technical implementations. - Mentor junior software developers, establish documentation best practices, and conduct precise structural code reviews to ensure scalability and standards alignment.	

CSS India Center Pvt. Ltd — Software Engineer (PHP)

Sep 2019 – Sep 2021 | Hyderabad, India

- Conducted programmatic impact analysis and developed granular engineering effort estimations for enterprise application upgrades and continuous integration pipeline features.
- Executed comprehensive end-to-end full-stack web feature development utilizing native PHP, asynchronous jQuery mechanisms, and complex structured MySQL query management.
- Engineered fluid, cross-browser compatible, and device-responsive user interfaces to optimize web performance metrics and client retention rates.
- Refactored legacy application modules to eliminate database execution bottlenecks, significantly improving application performance, security, and long-term maintainability.

eProSoft India — PHP Developer

Oct 2018 – Sep 2019 | Visakhapatnam, India

- Developed and customized scalable core themes, custom structural plugins, and advanced transactional lifecycles for high-traffic WordPress and WooCommerce digital stores.
- Engineered robust e-commerce solutions covering product catalog management pipelines, optimized checkout single-page workflows, and external payment gateway API integrations.
- Enhanced analytics reporting models, ensuring clean data accuracy, performant server rendering, and cross-browser viewport scaling.

Ayatas Technologies — WordPress & PHP Developer

Mar 2015 – Feb 2018 | Visakhapatnam, India

- Authored customized PHP frameworks, dynamic extension modules, and interactive responsive layouts tailored to complex multi-client software deliverables.
- Collaborated in agile cross-functional teams including UI/UX design panels and QA teams to refine application quality assurance parameters.
- Managed the complete technical delivery of concurrent projects simultaneously, consistently maintaining product quality and meeting strict deployment target dates.
- Provided rigorous post-deployment hypercare support, implementing continuous code refinements based on real-world telemetry and client operational feedback.

KEY INNOVATION & TECHNICAL PROJECTS

Generative AI E-Commerce Pipeline (Innovation Project)

Personal & Professional R&D

Technologies: Google Gemini (AI Studio), Python, FastAPI, Image Processing Pipelines

- Architected and implemented an autonomous end-to-end generative AI product listing engine. It transforms raw image files into fully optimized product listings for Amazon and Meesho platforms.
- Automated real-time generations of SEO-friendly metadata, descriptive content, structured product pricing, and competitive keyword analysis utilizing advanced Large Language Models.
- Integrated computer vision checks to run systematic audits, guaranteeing compliance with Amazon's structural 85% product-fill and crisp white-background requirements.

CHPTR Platform Development

Technologies: ReactJS, Python, FastAPI, RESTful APIs

- Designed and executed a highly responsive dashboard interface in ReactJS connected with specialized, high-throughput REST APIs.
- Built and deployed robust FastAPI-driven backend schemas engineered for low-latency, core CRUD operations, secure data layer persistence, and schema scaling.

Quick Fix Golf — Interactive Web & Mobile Ecosystem

Technologies: ReactJS, Redux, AWS Lambda, Python, AWS Cognito, Stripe API

- Engineered an interactive, scalable full-stack application dashboard featuring live video-chat integrations, complex messaging backbones, and responsive mobile adaptations.
- Built secure user access provisioning utilizing AWS Cognito Federated Authentication alongside flexible automated cloud microservices deployed via AWS Lambda.
- Developed robust user onboarding structures, continuous telemetry collection frameworks, and recurring premium subscription workflows.

Enterprise Web Portfolios & Legacy Deliverables

Technologies: PHP, jQuery, SVN, WordPress, WooCommerce, MySQL

- **Boca West Country Club:** Conducted complete system footprint impact assessments, designed full web-and-mobile layouts, managed localized versioning via SVN, and coordinated feature effort breakdowns.
- **Commercial CMS Implementations:** Designed and deployed optimized commercial e-commerce platforms and portfolio layouts including Biosell Solutions, Matt Manero (Commercial Fleet Financing), CA Ripped Fitness, MJ's Cafe & Bakery, and Platypus Wine Tours.

EDUCATION

Master of Computer Applications (MCA) *Noble Institute of Science and Technology — Visakhapatnam, AP | 2014*

Bachelor of Computer Applications (BCA) *Sai Institute of Information and Technology — Bhilai, CG | 2011*
