Professional Experience

Yotta TechPorts – Sr. Software Associate

Oct 2021 – Dec 2025 | Hyderabad

- 1. Developed scalable web and mobile applications using **ReactJS**, delivering interactive dashboards and performance tracking solutions.
- 2. Integrated secure backend services using **AWS Lambda, REST APIs, and Python**, enabling scalable and serverless architecture.

3. Integrated **Stripe payment gateway with GoHighLevel & Apple in-app purchase** for subscription and quote-based payment processing.
4. Mentored junior developers, performed code reviews, and ensured high-quality deliveries.

CSS India Center Pvt. Ltd – Software Engineer (PHP)

Sep 2019 – Sep 2021 | Hyderabad

1. Conducted detailed impact analysis and provided accurate effort estimations for feature enhancements and change requests.
2. Developed end-to-end frontend development using **PHP, jQuery, and MySQL**, ensuring seamless functionality for web applications.
3. Built responsive and cross-browser compatible user interfaces & Optimized existing modules to improve performance and maintainability

eProSoft India – PHP Developer

Oct 2018 – Sep 2019 | Visakhapatnam

1. Developed interactive UI components and dynamic report generation modules for client-facing applications.
2. Worked extensively on **WordPress and WooCommerce** websites, building and customizing themes and plugins.
3. Enhanced website performance, responsiveness, and cross-browser compatibility.
4. Maintained and supported existing web platforms with continuous improvements and feature enhancements.

Ayatas Technologies – WordPress & PHP Developer

Mar 2015 – Apr 2018 | Visakhapatnam

1. Created responsive websites and custom modules for client projects.
2. Worked on cross-functional collaboration with designers and testers.
3. Managed multiple client projects simultaneously while maintaining delivery timelines.
4. Provided post-deployment support and enhancements based on client feedback.

Key Projects

1. CHPTR (ReactJS, Python)

Developed responsive ReactJS interface with REST API integration and built FastAPI-based backend APIs for core CRUD operations.

Collaborated closely with the on-site team to address business requirements and provide regular project updates.

2. Quick Fix Golf (ReactJS, Redux, AWS, Python)

Developed scalable web and mobile applications including **Quick Fix Golf**, where I built interactive dashboards, chat systems, subscription workflows, and onboarding features using ReactJS, AWS Lambda, Python, and Cognito authentication for secure and scalable architecture.

3. Quote Management System (ReactJS, REST APIs)

Built an insurance quote generation and management platform using ReactJS.

Developing reusable modules and contributing during the initial stages of project setup and package structuring, while optimizing performance through efficient state management

4. Boca West Country Club (PHP, jQuery, MySQL)

Conducting impact analysis, providing accurate estimations, managing version control with SVN, and owning complete frontend development for web and mobile compatibility.

5. WordPress Websites

Early in my career, developed and customized WordPress and WooCommerce websites, building themes, plugins, and e-commerce functionalities, and delivering responsive solutions for multiple clients including:

- Biosell Solutions
- Matt Manero – Commercial Fleet Financing
- CA Ripped Fitness
- MJ's Cafe & Bakery
- Platypus Wine Tours

Education

- MCA – Noble Institute of Science and Technology, Visakhapatnam, AP (2014)
- BCA – Sai Institute of Information and Technology, Bhilai, CG (2011)
